OB Shared Care

Complete Care for You & Your Baby

*Keep seeing the doctors who know
you & your family*

Get expert care for labor & delivery

*Seamlessly transition to follow up care
for both you & your new baby*

When you participate in OB Shared Care, family medicine providers, Dr. Karen Leslie and Dr. Amber Childers in partnership with OB-Gyn, Dr. Randy Erickson, will work together to provide you with the best care during your pregnancy, at delivery and following childbirth.

Normal pregnancies without significant complications or pre-existing medical conditions can be managed by your family physician. Dr. Erickson will be available to help manage your care should complications arise.

Dr. Erickson, or occasionally a covering on-call OB provider, will deliver your baby at Self Regional Healthcare Women's Center.

A typical prenatal visit typically includes weight and blood pressure measurement, a physical examination as well as a variety of other tests and treatments to ensure you and your baby stay healthy throughout your pregnancy.

To learn more about **OB Shared Care** or to make an appointment, call us at **864-379-2345**.
